

# O-Plate™ & O-Plate Jr.™ (O'Connell Rescue Plates)

The O-Plate™ (OPL) and O-Plate™ Junior (OJR) are multipurpose Extrication and Heavy Rescue tools which give modern day rescuers more tools for dealing with today's complex rescue environment.

## O-Plate™ Jr.

List Price: \$225

O-Plate™  
List Price: \$375

You will probably use the O-Plate™ most frequently in vehicle extrication, where they will help make dash rolls quicker and safer. When heavy rescue is necessary, the O-Plate™ is instantly available to anchor systems, pull up to 19,000 lbs. of concrete or debris (using your hydraulic extrication equipment if necessary), bridge holes or joists to anchor pushing or pulling systems, and enhance the capabilities of jacks.

The O-Plate™ Junior is most appropriate for vehicle extrication stabilization and hydraulic tool support. The O-Plate™ Junior can be used as a rocker panel ram or jack support as well as supporting spreading tools.

Hydraulic Tool Support

19,000 lb. Anchor / Hook

Pull / Anchor Systems

Rocker Panel Ram Support

Wheel Traction for Winching

Wheel Pull / Edge Protector

Although many of our pictures show the O-Plate™ as yellow we have changed the standard color to red.

## Also Available From Rescue 42

The JackMate™ replaces a standard lift jack's limited capacity top clamp with a multipurpose attachment that is rated to the full capacity of the jack as either a clamp, winch, spreader or a base.

Developed by a firefighter as a manual rescue tool, the JackMate™ is the perfect tool for Fire/Rescue, Off-Road, Ranch/Farm or Construction.

available in the following colors

List Price: \$39.95

JackMate™ is designed to fit most brands of lift jacks.

## McLASKI™ Wildland Combination Tool

The McLaski™ combines the best features of the McLeod and Super "P" Pulaski with lots of extras, making it the ultimate wildland tool.

- MCL-42C: 42" Composite Handle
- MCL-48C: 48" Composite Handle
- MCL-60C: 60" Composite Handle

List Price: \$149

# THE SHARK™

## collapsible step cribbing

The Shark™ collapsible step cribbing will save critical storage space on your rig for more important equipment. Its innovative design is taller than most traditional step chocks, collapses to 5½" and provides a solid platform for vehicle stabilization.

You can fit 4 Sharks™ in less space than 2 wood or plastic chocks require.

The Shark's™ tough steel construction meets the 2:1 height to base ratio requirement for stability.

In icy or muddy conditions, a picket (stake) can be driven through the baseplate of the Shark™ into the ground to prevent slipping or kickback.

The Shark™ can also be used as an anchor point for struts and other cribbing by using ratchet straps.

- Taller than traditional step chocks
- Collapsible & stackable for compact storage, 2 Sharks™ nested stand at only 7"
- Meets 2:1 height to base ratio for safety
- Accepts pickets and ratchet straps
- Easy to clean and decontaminate

**The Shark™ - Large (SRK-L):** The Large Shark™ is intended for rescue companies that regularly use step cribbing. At 16½" tall, it can stabilize most high clearance vehicles.

List Price: \$299

**The Shark™ - Small (SRK-S):** The Small Shark™ is perfect for smaller apparatus with limited compartment space but who still need to carry cribbing as a first due responder.

List Price: \$249
