

NEW

\$39⁹⁵

Off-Road • Farm/Ranch • Construction • Fire/Rescue

The JackMate® replaces a standard lift jack's limited capacity top clamp with a multipurpose attachment. The JackMate® is rated to the full capacity of the jack, slides over either end of the jack bar and is attached with a quick-release pin.

As a replacement for the jack base, the JackMate® is engineered to "bite" into boards or logs to help prevent the jack from sinking in mud, sand, ice and snow.

Increase the versatility of your lift jack:

- spreading
- pushing
- pulling
- winching
- clamping
- crushing

then pop the cap!

Available in 5 colors:
Fire Engine Red, True Black,
Luminous Silver, Forest Green,
and Black Silver Vein

Order #: JM-R42

Lift Jack Accessory

RAVE REVIEWS

“The latest item I can honestly add to the list of wonder tools - the JackMate® - falls into my "in awe" category!”

~ Bill Burk, 4 Wheeling America LLC

“If you own a Hi-Lift®, you should also own a JackMate®. It's that good”.

~ Dirt Road Magazine

“We consider [the JackMate®] one of our ‘must have’ tools/accessories”.

~ Rick Webster – 4x4 Review

“The JackMate® is a necessity for any fourwheeler. Get one before your next adventure and be prepared”.

~ www.bc4x4.com

“We had a chance to try out a Rescue 42 JackMate® and found that our Hi-Lift® could become way more useful than we thought just by adding an attachment”.

~ John Cappa - JP Magazine
