

**Telecrib® Struts**

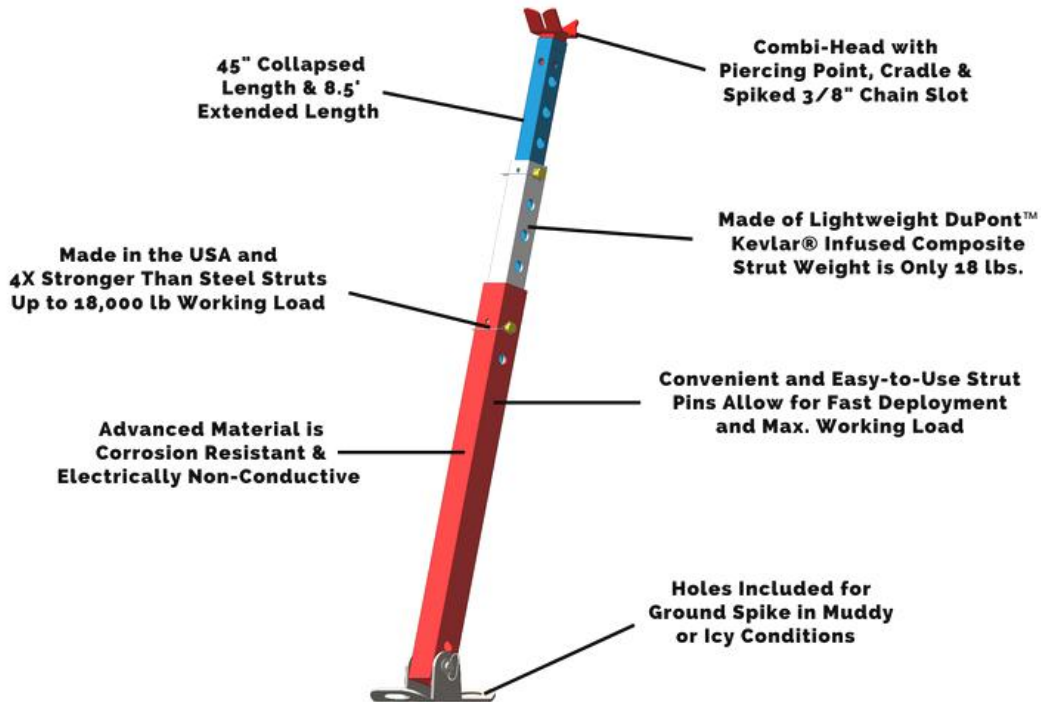

***DESIGNED  
TO HELP  
YOU SAVE  
LIVES.***

The Telecrib® Struts offer the strength and efficiency you need to safely stabilize a vehicle in preparation for patient extrication.

First Responders know that successful extrication starts with proper vehicle stabilization. Made with advanced Kevlar® infused composite materials, the Telecrib® Struts are four times stronger than steel, but lightweight and collapsible for quick deployment. Their versatile design allows them to pair easily with a number of Rescue 42 extrication tools.

Saving lives means having the right tool. Rescue 42 tools are trusted by thousands of Departments, and designed for First Responders by a First Responder.

# TELECRIB® STRUTS

*Because strength matters.*

➔ Convenient deployment allows you to stabilize the vehicle, machinery or structure fast and efficiently.

➔ Compact design for minimum storage requirements. Only 18 lbs (CTC-502) and 45" collapsed length.

➔ Advanced Kevlar® material means safety. Up to 18,000 lb working load, non-conductive, & a 2:1 safety factor.

Watch. Buy. Save Lives.
