

The Shark™

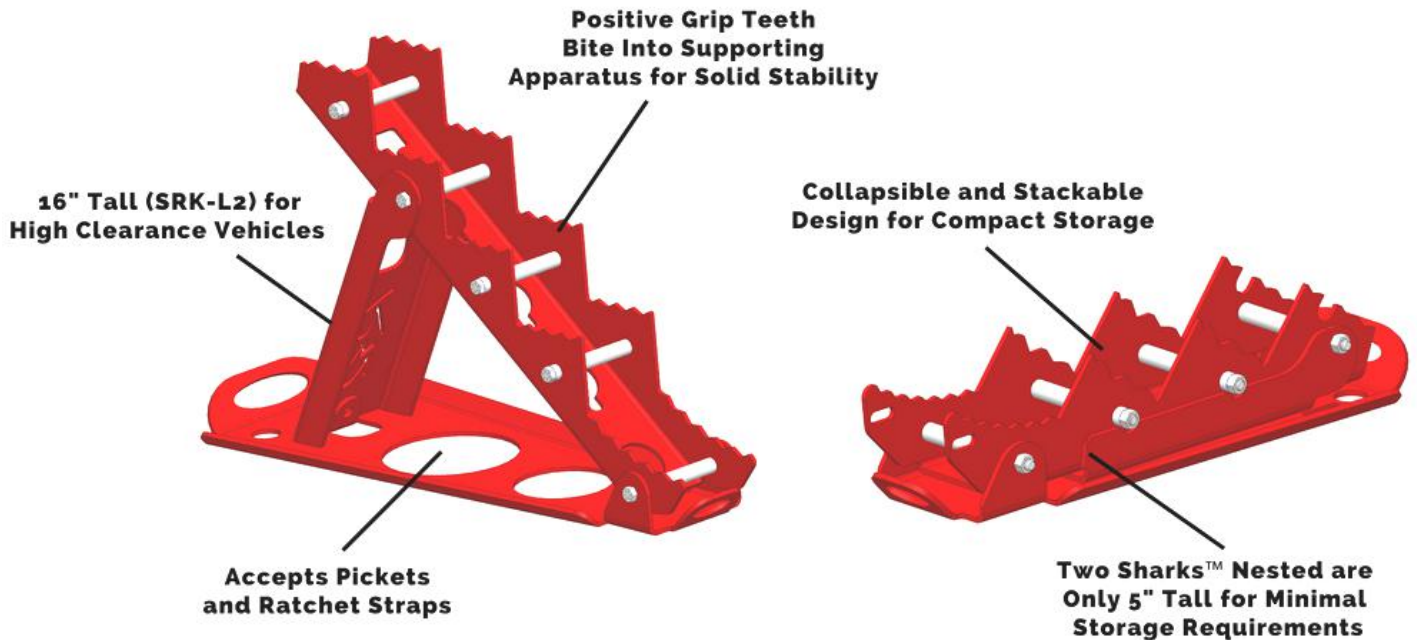

***DESIGNED
TO HELP
YOU SAVE
LIVES.***

The Shark™ and Shark Jr.™ are collapsible step cribbing chocks designed to give the vehicle frame stabilization during extrication.

First Responders know that extrication often requires various methods of stabilization including step cribbing. Unlike traditional step chocks, the Shark™ and Shark Jr.™ are collapsible, allowing them to nest and lock together for convenient storage. The Large Shark™ is 16" tall, giving you solid stabilization on most high clearance vehicles.

Saving lives means having the right tool. Rescue 42 tools are trusted by thousands of Departments, and designed for First Responders by a First Responder.

THE SHARK™

Because space matters.

➔ The Large Shark™ is 16" tall for high clearance vehicles. Both the Large and Junior Sharks™ collapse to 5".

➔ Stackable design means your Sharks™ can be nested for minimum storage requirements on your rig.

➔ Made of steel with a 2:1 safety ratio for strong and safe step cribbing. Positive grip teeth adds extra stability.

Watch. Buy. Save Lives.
