miniNSD™

A Network System Deployable Delivering Cellular and High-Speed Internet When & Where It's Needed.

miniNSD™

SLC+™

The miniNSD is a carrier agnostic, highly portable, customer owned deployable cell tower contained in two ruggedized cases. The system includes both the miniNSD and the SLC+.

Create your own Cellular and Wi-Fi hotspot, even in the most remote environments. The High-Performance Starlink® satellite system in the SLC+ provides cellular backhaul and high-speed Internet, almost anywhere.

They can be rolled, hand-carried or transported by a single person in a vehicle, by air or over water anywhere communications are needed.

*Contact your Rescue 42 Regional Account Executive for compatible carrier options available.

Features

- Cell Range up to 1000'
- Wi-Fi Hotspot up to 500'
- Connect up to 64 LTE Devices
- High-Speed Satellite Internet
- Weatherproof + Waterproof
- Ability to Control LTE Access
